Hugh McIntosh from Network Investigations rang
 re Alan Smith 267267 on 27/7/92. CP 03-4288982

He is attempting to locate problem in the network which
 has been causing Mr Smith's RVA problems. To do this he
 needs as much detail as possible regarding these calls, particularly
 area code & first 4 digits of phone no.

I rang Mr Smith and got the following details

Heywood School	271200	} October 91 - Feb 92
Portland	233 49	
Heywood Museum	?	
Haddon Community Centre (B. Barak)	053-424613

File HA-AC 4/1/18 Subject GRADE OF SERVICE COMPLAINT
MR ALAN SMITH 055-26 7267

000571

Phone 055-73 0200 From MARK ROSS
CUSTOMER SERVICES MANAGER
HAMILTON - VIC/TAS REGION

To CHRIS DOODY - NETWORK OPERATIONS
GRAEME DAVIES - FAULT BUREAU VIC/TAS

Chris/Graeme

Please find enclosed documentation in regard to a Grade of Service Complaint from Mr Alan Smith of Cape Bridgewater.

↓ Our local technicians believe that Mr Smith is correct in raising complaints about incoming callers to his number receiving a Recorded Voice Announcement saying that the number is disconnected.

They believe that it is a problem that is occurring in increasing numbers as more and more customers are connected to AXE.

Can you please investigate this problem and provide me with a written reply so as I can forward this to Mr Smith and our local Federal Member, before what is already a difficult situation, gets right out of hand.

Mark Ross
Customer Services Manager - Hamilton

6th April 1993

The Editor,
Herald Sun Newspaper,
Box 1924R,
MELBOURNE 3001

Dear Sir,

I am writing in reference to your article in last Friday's Herald/Sun (2nd April) about phone difficulties experienced by businesses.

I wish to confirm that I have had problems trying to contact Cape Bridgewater Holiday Camp over the past 2 years.

Our former Youth Worker, Gladys Crittenden, experienced problems before and after organizing a Family camp for January 1992. On several occasions she received a recording notifying her that the number was no longer connected.

I have also experienced problems while trying to organize our Family Camp for September this year. On numerous occasions I have rung from both this business number and also my home number and received no response - dead line.

I also rang around the end of February (1993) and twice was subjected to a piercing noise similar to a fax. I reported the incidence to Telecom who also got the same noise when testing.

Telecom should have a reference to this incident as I was informed that I would not be charged for the two calls.

With constant problems experienced it is lucky that we are aware that there is a problem with the phones and that the business is still operating.

Persistence is the only way of making contact at times. I would not like to think that this was an emergency number that I was trying to contact.

I am also concerned as to how often we are charged for these unsuccessful calls by Telecom. as we do not get an itemised account, we are unable to check.

Yours sincerely,

Cathy Lindsey
Cathy Lindsey,
Co-ordinator.

5 May 1993

Mr Alan Smith
RMB 4408
CAPE BRIDGEWATER VIC 3306

Dear Mr Smith

I am writing to you to confirm details of telephone conversation difficulties experienced between this office and your residence mid-morning this day, 5 May 1993.

At approximately 11.30am today Mr Alan Smith telephoned this office requesting to speak with Mr Don Burnard. Mr Burnard was not available to take the call. Mr Smith then explained the reason for the call but during this time the telephone cut out three times. Each time Mr Smith telephoned back to continue the call.

It is now 5.00 pm and I have experienced no further difficulties with 10 incoming or 13 outgoing calls on this line today.

Yours sincerely

Brigid Smith
Secretary

FACSIMILE NUMBER: 03 697 7885

Dear Sir,

RE: "PROBLEMS WITH TELECOM"

I have watched with interest the shorts leading up to tonight's program as I have similar problems to the man at Cape Bridgewater.

Our office is located in Ballarat and due to Telecom structure the majority of our calls are STD-fee based.

On many occasions we have been unable to get through to numbers we have dialled, often receiving the message "this number is not connected" or similar messages which we know to be untrue.

Clients report that they often receive the engaged signal when calling us and a review of the office reveals that at least one of our lines was free at the relevant time.

We have just received our latest Telecom bill which is about 25% above the last bill. This is odd because our number of calls in the billing period was down by about 25% and we have a start member less than the previous billing period.

Telecom say that they are unable to provide us with an itemised account for our residential lines, despite the fact that we are in the central business district of Ballarat and not some remote rural community.

I strongly support any enquiry to be held.

Yours Faithfully

DAVID M. THOMSON & ASSOCIATES PTY. LTD. BALLARAT

Date: Thursday, 24 February 1994 11:07AM

Peter,

You are quite correct in your thought that the anecdotal reference applies more to AXE than ARE-11.
"Lockups" are generally well-known as a problem in AXE exchanges, not only in Australia but in overseas countries as well. A number of upgrades have included software which would reduce the incidence of lockups. ↙

There is nothing to add to my previous notes on ARE-11 exchanges concerning claims of 'incompatibility' problems.

Regarding the problems in AXE: ↙

In the NASM database (which has a record of faults reported from AXE exchanges, dating from 1968 when it was introduced, although it was not in widespread use till 1992/3) there are 105 reports of Lockups affecting customers. Two of these reports refer to PBX services, but there are no reports referring specifically to 'Commander' services.

The TR database (Trouble Report system controlled by TNE to monitor problems reported, passed to Ericsson, and fixed by Ericsson) which was used prior to NASM for all records of faults does show lockups on AXE equipment which would have affected customers and PBX functions, but does not provide any realistic count of problem occurrences. It does not record any lockups specifically related to 'Commander' systems.

As a general comment, if the first line was locked up and calls allowed to flow on to the other lines, then no calls would be lost until all lines were busy, so I fail to see how an estimate that "call loss could be up to 15%" could be made or repeated with any degree of integrity. ↙

There is also another NSIS database which would contain records of AXE faults which I have not checked yet but which I believe has records of large numbers of lockup instances affecting individual customers lines. I am reluctant to initiate a search of the NSIS database at present as the faults recorded therein would have no bearing on the CoT services in question, unless the fault occurred on their individual line.

Kevin.

Fran, I am not sure where Alan is - please pass to him if he is on the 24th floor.

A13980

Kevin, Alan

Kevin, I did not use your comments on software (COMPATBL) at this time as they didn't seem relevant to the additional information that Austel have provided. John MacMahon writes as follows:

I have references to Ericssons having considered a lock up fault which was occurring where the first line would be locked out and this would allow calls to flow to the other lines. It was said to arise through the

1009

incompatibility of exchange software and Telecom's equipment. Ericsson apparently provided a solution and advised that particular Commander systems were most vulnerable. Ericsson are said to have suggested that call loss could be up to 15%.

Any thoughts on this new line? It sounds a bit like AXE rather than ARE to me!

Peter.

92/0596(9)

11 February 1994

Mr S Black
Group General Manager
Customer Affairs
TELECOM.

Facsimile No: (03) 632 3241

Dear Mr Black

COT Cases - Provision of Information

Thank you for the material supplied on 9 and 10 February.

I make the following comments on individual detail supplied.

12.11.93 Request

The point to be made in the report is that the results of monitoring and testing programs were significant in Telecom's reaching a conclusion on the adequacy of the service. In assessing whether there was a reasonable basis to those conclusions, such details as what the objective was, the type of equipment used, was it end to end, when it was used in terms of times and dates, the results and conclusions would appear highly relevant. I would have imagined that such detail would have been an integral part of the technical assessment record but I take your response to indicate that the technicians received the output and reached a conclusion without documenting any of the above detail. Unless you indicate otherwise I will take that to be Telecom's response.

Where summary documentation has been prepared, it is my understanding that the detail would fall within the terms of AUSTEL's direction for the supply of data.

24.12.93 Request

I note your advice that, having considered the detail shown in the statutory declarations dated 27 and 29 September 1993, Telecom is of the view that all papers contained in the briefcase have been supplied to AUSTEL.

1009

2.

The "routine" material which AUSTEL found did not match the Telecom is attached.

30.11.93 Request

The query relating to Mr Dawson and the Maidstone RSS AXE node remains unanswered.

Concerning the allegation that staff have been advised that COT members are suing Telecom, there was no mention of Mr Dawson's allegation in your response.

You also supplied copies of certain advices to staff - these do not appear to be comprehensive - I am aware of a couple issued under Ms Pittard's name which were not included and would ask that you recheck your Victorian and Queensland administrations.

28.1.94 Request

You advise that S/Comp file NCS North is now located on a Japanese Spare Parts file. Does this mean that there were no complaints other than by Japanese Spare Parts? If there were, where are those other papers now located?

20.10.93 Request

Thank you for this data. The request sought data for each thousand block in the exchanges listed. I note the work involved - though it appears to be pulling a long bow to suggest a "tight timetable" when the request was made 4 months ago - and suggest instead

- for the metropolitan exchanges shown, data for each 1000 number block for each quarter included in the January 1992 - September 1993 period
- data for each of Cape Bridgewater (055-267.2..) and Devlins Bridge and Dixon's Creek.

Could you also

- identify the period involved for the data in the table originally sent
- comment on the effective call rate for North Melbourne 7000 range

3.

24.1.94 Request

Are you able to comment on whether customers were advised of the possibility of the BWN condition.

The material shown under (2) in the original letter is requested.

Undated Request (actually 2 February 1994) Re "Lock-up".

I have references to Ericssons having considered a lock up fault which was occurring where the first line would be locked out and this would allow calls to flow to the other lines. It was said to arise through the incompatibility of exchange software and Telecom's equipment. Ericssons apparently provided a solution and advised that particular Commander systems were most vulnerable. Ericssons are said to have suggested that call loss could be up to 15%.

Yours sincerely

John MacMahon
General Manager
Consumer Affairs

Senator Richard Alston - then Deputy Leader of the Opposition in the Senate and Shadow Minister for Communications - wrote to the Chairman of Austel in September 1993 expressing his concerns. This letter is now reproduced in full:

PARLIAMENT OF AUSTRALIA THE SENATE

SENATOR RICHARD ALSTON
Deputy Leader of the Opposition in the Senate
Shadow Minister for Communications

17 September 1993

Mr Robin C Davey
Chairman
Austel
5 Queens Road
Melbourne 3004

Dear Mr Davey

Thank you for your letter of 16 September enclosing a copy of your letter to the Minister of the same date.

I note that Austel is now "satisfied that the COT cases had received from Telecom an inadequate service", and I commend your decision to investigate and address these and similar concerns

The information being sought by Austel pursuant to section 400 of the Telecommunications Act 1991 is very important, particularly in relation to any internal or external investigations commissioned by Telecom which seeks to identify the technical causes of the complaints.

However I am very concerned at your suggestion that "even confining Austel's investigation to eight of the complaints is stretching Austel's resources" (paragraph 21).

It would be totally unsatisfactory, and certainly not in the public interest, if Austel's capacity to get to the bottom of these problems is in any way hampered by a shortage of financial, human or other resources and I would hope that, if it is necessary to do so, you will seek additional assistance from the Government.

In this context I am very disturbed to see that you appear to be content to allow Telecom to obtain the services of "an independent overseas network expert". If Austel's inquiry and findings are to be seen to be thorough and impartial it is essential that Austel, and not Telecom, should commission such a person. If lack of resources are a problem then Telecom could perhaps foot the bill. However at this stage I consider that such action may well be premature until it is established that Telecom has not in fact been able to identify the cause of the problems.

Electorate Office:
Illoura Plaza, 424 St Kilda Road, MELBOURNE VIC 3004
Phone (03) 866 3455 Fax (03) 866 3105

With regard to Telecom's proposed "deployment of a special team to review the history of each of the (COT) cases from a fresh perspective" it would be quite unsatisfactory if any member of such team had previously been involved with any of the COT cases in an administrative capacity. Again I do not see why the independent regulator should not be the one to carry out such a task.

Finally I note that Telecom proposes to engage one of the "Big Five" accounting firms to audit its handling of the COT cases with Austel merely having unspecified access to the consultants and its output.

If such an audit is to have any legitimacy it is essential that it should be commissioned and paid for by Austel. To allow one party to litigation to select and pay - undoubtedly generously - for the judge would not be tolerated in any judicial proceedings. It should not be tolerated here.

Yours sincerely

RICHARD ALSTON
Deputy Leader of the Opposition
in the Senate
Shadow Minister for Communications

RKR/aw

10 November 1993

Mr. Alan Smith,
Cape Bridgewater Holiday Camp,
PORTLAND, 3805
Fax: 26 7230

Dear Mr. Smith,

re: TELECOM FAULTS

I am writing in reference to the proposed Senate committee investigation into Telecom.

As you are aware, I am employed as telephonist with a large legal firm in Warrnambool. In the course of my employment, and particularly during the months of July and August this year, numerous service faults have been brought to my attention. These problems include:-

1. Calls being disconnected during conversation.
2. Recorded messages informing Melbourne clients and callers that the number has been disconnected when the correct number was dialled;
3. An engaged signal received by callers despite a number of lines being available;
4. Complaints from callers that the line has rung out when no ringing tone has been received at the number dialled.

Our firm duly contacted Telecom on a number of occasions in an effort to have these faults rectified. However, Telecom Technicians were constantly unable to identify the numerous problems and subsequently remedy our complaints.

It is evident that problems such as these have cost many companies in which the telephone plays a substantial role, a great deal of business.

Not only does poor telephone contact have a negative effect on business, but it is also a poor reflection on the telephonist who more often than not, bears the brunt of such grievances.

I strongly support Senator Ron Boswell's call for an inquiry into the problems with the Telecom network.

.../2

1011

- 2 -

Mr. Alan Smith

10 November 1993

I am hopeful this letter will assist in reaching results which will compensate for the losses suffered by business and personal customers alike.

Yours faithfully,

My itemised telephone account shows that on 22 May 1993 there were nine calls from the same number to my 1800 business telephone. The customer wrote "I dialled the telephone number ___ and finally after not being able to get through immediately, I quoted to you 'do I have the correct number for Cape Bridgewater Camp?' As at a previous time before finally getting through - at least twice 'a recorded message' was 'the number had been disconnected' which I thought at the time 'quite strange'. The calls varied from four seconds to twelve minutes and four seconds, and TELSTRA CHARGED FOR ALL OF THEM.

PORTLAND VIC 3305

Dear Mr Smith *Alan*

Thank you for your facsimile of 21 July 1993 about Mr Palmer's experiences with his telephone service.

I have written to Mr Doug Campbell, the Group Managing Director of Commercial and Consumer affairs at Telecom, about a number of problems brought to my notice as a result of a recent press release. A number of people seem to be experiencing some or all of the problems which you have outlined to me. I will inform you of Mr Campbell's response when it is received.

I trust that your meeting tomorrow with Senators Alston and Boswell is a profitable one.

Thank you once again for keeping me informed of developments.

Yours sincerely

Dear Mr Smith

Alan

Further to your conversations with my electorate staff last week and today I am enclosing a copy of the correspondence I have received from Mr Harvey Parker, Group Managing Director of the Commercial and Consumer division of Telecom.

I wrote to him outlining the problems of a number of Telecom customers in the Western Districts, including the extensive problems you have been experiencing.

Thank you once again for keeping me informed of developments at your end.

Yours sincerely

Exchange Fault Reports to 23-Jun-94

Customer: Alan Smith

Service Plus No: S6716189 Fault Experienced: 26/4/94 12:03 - 14:08

Complaint: Mr Smith disputes a number of calls which are charged to his telephone account 008 816522 (055 267267) on the 26/4/94. (Ten calls in total). The origin of the calls in question originated from 03 568 1824, a service operated by his Son. However Mr Smith claims his Son only rang about three times on that day.

Action: Analysis of Call Charge record and CCS7 data for 26/4/94 on Mr Smith's 008 816522 (055 267267) service, indicates that all calls charged to Mr Smiths account did in fact originate from 03 568 1824. CCS7 data further indicates that between the time of the first call at 12:03 pm and the last call at 14:08 pm on this day, a minimum of 15 other call attempts from service 03 568 1824 were made to 055 267267 and encountered a busy signal.

ERC&A 36

SENATE—*Legislation*

Tuesday, 24 June 1997

Mr White—Yes.

Senator O'CHEE—And what were you told in that induction briefing about the group's role?

Mr White—In the first induction—and I was one of the early ones, and probably the earliest in the Freehill's area—there were five complainants. They were Garms, Gill and Smith, and Dawson and Schorer. My induction briefing was that we—we being Telecom—had to stop these people to stop the floodgates being opened. ↙

Senator O'CHEE—What, stop them reasonably or stop them at all costs—or what?

Mr White—The words used to me in the early days were that we had to stop these people at all costs. ↙

Senator O'CHEE—So when you were told to do a document better, that meant to do a better job of stopping them at all costs?

Mr White—I would say explaining the information available to the best of my ability. That is the best way I can explain it.

Senator O'CHEE—To the satisfaction of—

Mr White—The team leader.
